

## **VCSims Product Details**

### **RS1 Model**

The base model RS1 is perfect for customers that already have their own computer system, but would like to take advantage of our revolutionary 180 degree screen technology. The RS1 package includes a high definition projector, projector ceiling mounting bracket, simulator frame structure, and basic racing seat. The RS1 also comes equipped with a Logitech G25 steering wheel, featuring 900 degrees of wheel rotation, a gas/brake/clutch pedal set, and a 6-gate h-pattern/sequential gear shifter.

---

### **RS1 with Projector Tower Model**

The RS1 package with a projector tower and trainer station for added convenience.

---

### **RS1 Xtreme Model**

For the serious racing enthusiast! The RS1 Xtreme includes all of the RS1 components with the addition of a high end computer, mouse and keyboard, speakers, and a 20" flat screen monitor. Also includes a 300 watt Buttkicker amplifier with 3 transducers that use specific sound notes to intensify your driving experience. Now feel every rumble strip, bump, vibration, and more in real-time directly through your high quality racing seat. This turn-key package is polished off with high-end CST racing pedals, an SST 8-gate shifter, and a modified G25 steering wheel with functional dashboard. The RS1 Xtreme gives you the equipment you need to shave valuable seconds off your lap times!

### **RS1 Xtreme with Projector Tower Model**

The RS1 Xtreme package with a projector tower and trainer station for added convenience.

---

### **RS1 Xtreme M3 Model**

Once you get in, you won't want to get out. From the famous Laguna Seca corkscrew to the high banks of Daytona, feel every ounce of the on-screen action through the RS1 Xtreme M3 powered by D-DOX! This model features the same components as the RS1 Xtreme with the addition of a top-of-the-line 3-axis motion actuator system. Now feel acceleration at up to 2Gs, as well as pitch, roll, heaves and intelligent vibrations – perfectly synchronized with all of the action on-screen. The actuator system is designed to work with popular software titles such as iRacing, rFactor, ACTC, ARCA Sim Racing, DIRT, GRID, Live For Speed, Need For Speed Undercover, Nitro Stunt Racing, and X-Motor Racing. No matter what your software preference, the RS1 Xtreme M3 will bring out the virtual racing legend in you!

---

### **RS1 Xtreme M3 with Projector Tower Model**

The RS1 Xtreme M3 package with a projector tower and trainer station for added convenience.

**VCSims RS1 Xtreme M3 Simulator without the Projector Tower**

***“It doesn’t need to look like one,  
It only needs to feel like one”***
